Every crop grower, white and black, who did not raise pigs last year should keep a brood sow. For every brood sow kept last year, two should be kept now.

Our Soldiers and our Allies must have the meat and fat of pork. A shortage of pork will make the war last longer and bring death to thousands more American boys.

Hogs are grown at a loss when fed corn alone. Give them one-fourth of a feed of corn each day. Have a pasture, raise for them turnips, roasting ear corn and early sweet potatoes.

An acre of Bermuda pasture on good land will make during the summer from 200 to 500 lbs. of gain on pigs after deducting that made from corn they eat. This gain from the acre of pasture is equal to that made from 20 to 50 bu. of corn. At \$5 an acre rent for Bermuda pasture, the gains put on from it will be made as cheaply as from corn costing 10 to 25 cents a bushel.

Turnips on good soil will make hogs gain as cheaply as corn at 56 cents a bushel, early and sweet corn fed green with the stalk, at as low a cost as corn at 30 to 60 cents a bushel and early sweet potatoes as cheaply as corn at 57 to 80 cents a bushel.
